MULTI-FUNCTION STEERING WHEEL

Designed for extra levels of safety and added driving convenience, the Pajero's Multi-function Steering Wheel lets you operate the vehicle's Audio and Cruise Control functions without ever having to take your hands off the wheel. It's now also equipped with Bluetooth capabilities for complete Handsfree Voice Control, keeping you connected and in control whatever the driving conditions you are facing.

SUPER SELECT 4WD-II WITH REAR DIFFERENTIAL LOCK

2H (2WD High Range)

2H mode shifts you into rear wheel drive for smooth, quiet, fuel-efficient performance.

4HLc (4WD High Range with Centre Differential Locked)

Keeping you on track even in rugged or slippery conditions, the 4HLc mode distributes power equally to all 4 wheels for off-road excitement with a 50:50 split for a steady sense of control.

4H (4WD High Range)

Switch to 4H mode for added traction. The dynamic 33:67 front/rear torque split gives you greater control for high-speed driving.

4LLc (4WD Low Range with Centre Differential Locked)

Switch to 4LLc when you need all the tractor-like crawling power you can get. Maximised low-end torque pulls you through even the roughest terrain. Vehicle has to be stationary to engage in this mode.
