MITSUBISHI  
MOTORS  
Drive your Ambition

  
MITSUBISHI  
MOTORS  
Drive your Ambition

## Rugged Sophistication

Venture out further with the redesigned XPANDER CROSS. Design updates scream adventure with a tougher and more aggressive MPV appearance from every angle. With refinement that complements in any situation, the XPANDER CROSS provides more comfort, convenience, and enjoyment to your driving experience no matter where you go.

## Drive your Ambition

Aggressive capability in any situation.

#### High ground clearance and high driving view

Top-level ground clearance and a high driving position allow confident and comfortable driving on bumpy or uneven roads and a clear view of the road ahead.

Eye point height:

**1,340<sub>mm</sub>**

Minimum ground clearance: **225<sub>mm</sub>**

#### A stable, comfortable ride

Enjoy your drive in comfort.

A reinforced suspension system with high-performance shock absorbers provides stable handling and exceptional ride comfort.

Front suspension

Rear suspension

Maximum enjoyment. Maximum fun.

## Spacious luggage room

Enjoy any outdoor activity with the spacious luggage room. The wide opening makes loading and unloading easy for anyone. What's more, convenient compartments and underfloor storage help keep your smaller items organised.

Underfloor luggage area storage

Rear luggage compartment

## Convenient storage & power outlets for all passengers

Keep your interior clean and organised with smart storage solutions. With power outlets on every row, all passengers can keep their smartphones, tablets, or other electronic devices charged.

\*DC12V USB adapters not included.

The performance you desire. The safety you need.

#### Active Yaw Control [AYC]

AYC enhances cornering performance by optimally adjusting driving and front brake forces by monitoring driver input and vehicle information. What's more, you can see AYC in operation on the LCD display meter.

#### Active Stability Control [ASC]

Maintain control on slippery roads and around turns. ASC automatically adjusts engine output and applies the brakes where needed to prevent skidding when the tyres lose their grip.

#### Anti-lock Brake System [ABS]

Brake safely on slippery roads. ABS helps the wheels from locking up when braking.

#### Active Stability Control [ASC]:

The control capabilities of ASC are supplemental only. Please drive safely and never rely solely on these functions whilst driving. Be sure to use the same specified type and size of tyres on all 4 wheels. Do not instal any aftermarket limited slip differential on your vehicle.

#### Anti-lock Brake System [ABS]:

ABS can help the driver maintain control whilst braking, but is never a substitute for safe driving. ABS does not always reduce stopping distances, which may be influenced by many factors including road surface conditions and friction between the tyres and road surface.

Please see the owner's manual for additional information.

An elegant interior that fuels the adventure.

### Comfortable, convenient, and enjoyable for all.

The refined and stylish interior comes with convenient and comfortable features that make driving easier and more enjoyable. The new and easier-to-see 8 inch colour LCD meter is built in the solid and sleek instrument panel that expands from end to end along a sturdy horizontal axis for a clear front view from inside. The new 4 spoke steering wheel with intuitive switches is slightly square-shaped for a more natural and comfortable grip that provides better manoeuvrability.

## Spacious cabin and versatile seating arrangements

Flexible seating configurations provide support for any outdoor activity. Load items easily by folding down the second and third row seats, or fold the second row armrest to store long items.

Expand your adventures.

FEATURE HIGHLIGHTS

Exterior

LED headlight  
(High/Low beam)

Both the high and low beams are LED-powered for improved brightness and illumination.

Roof rail

The roof rails painted in black are not only useful for outdoor activities but also create a unique and tough-looking vehicle outline.

17-inch alloy wheel

The redesigned 17 inch alloy wheels come in a grey two-tone colour for a tough and robust look.

Mechanism

Responsive 1.5L MIVEC engine

The spirited 4-valve DOHC engine with advanced MIVEC\* puts ample power at your command – more than enough to carry seven adults up steep mountain roads with ease.  
\*Mitsubishi Innovative Valve timing Electronic Control system

Comfortable cabin space

To achieve a surprisingly quiet interior, certain areas of the body are covered with high-performance sound absorbing and vibration blocking material.

Safety

RISE body

RISE (Reinforced Impact Safety Evolution) body helps keep everyone safe in the event of a collision by efficiently absorbing energy and maintaining high cabin integrity.

Driver and passenger SRS airbags

The driver and passenger SRS airbags protect front occupants by absorbing impact force to help keep them safe in frontal collisions.

Interior

4-spoke steering wheel

The new steering wheel with intuitive switches is slightly square-shaped for a more natural and comfortable grip that provides better manoeuvrability.

8-inch colour LCD meter

The new 8-inch colour LCD meter is easy to see and understand, and allows screen layout changes. Content can be accessed using the directional switches on the steering wheel.

Utility

Tilt and telescopic steering wheel

Enjoy your drive in comfort. The steering wheel can be adjusted up, down, forwards, and backwards to find the ideal driving position for any driver.

Electric parking brake (Brake auto hold)

Turn Electric parking brake on/off with a simple switch. When Brake auto hold is active, the vehicle will temporarily stay in place even with your foot off the brake pedal.

Digital cooler panel

The new digital cooler panel isn't just stylish but intuitive and easy to use.

Pretensioners

Pretensioners help reduce frontal impact force in frontal collisions when used with seatbelts. Front seatbelt pretensioners automatically tighten in a collision to help restrain front occupants.

Hill Start Assist [HSA]

For peace of mind during stop-and-go uphill driving, HSA maintains braking force until the accelerator is pressed to prevent the vehicle from rolling backwards.

Emergency Stop Signal system [ESS]

Prevent being rear-ended. ESS automatically flashes the hazards during sudden braking or when ABS is activated to warn following vehicles.

Hill Start Assist [HSA]: HSA is not a substitute for safe driving. Never rely solely on this function whilst driving on steep roads. Your vehicle may move backwards if the brake pedal is not sufficiently depressed, if the vehicle is heavily loaded, or if the road is very steep or slippery. This function is not designed to keep the vehicle stopped in place on uphill slopes for more than 2 seconds. Do not rely on this function to maintain a stopped position as an alternative to depressing the brake pedal. Please see the owner's manual for additional information.
